

WHY PSYCHIATRISTS ARE SO INCOMPETENT

WHEN A PSYCHIATRIST IS TALKING TO A PATIENT IN PERSON THEY ENTER A DELUSIONAL STATE OF MIND WHEREBY THEY BELIEVE THEY HAVE TELEPATHIC-LIKE POWERS AND CAN TELL WHAT A PATIENT IS THINKING "BASED ON THEIR EXPERIENCE OF ASSESSING PATIENTS". THEY DO NOT PAY ATTENTION TO THE PATIENTS USE OF LANGUAGE AND CHOICE OF WORDS AS PART OF THEIR ASSESSMENT AND INSTEAD HAVE A GUESS WHAT THEY MEAN BY LOOKING AT BODY LANGUAGE, SOMETHING EVERY PATIENT DOES DIFFERENTLY. THEY THEN TAKE INFORMATION FROM EXTERNAL SOURCES SUCH AS STAFF IN A PSYCH WARD OR FRIENDS AND FAMILY ABOUT WHAT ACTIONS AND HOW THEY HAVE BEHAVED AND "BASED ON PAST EXPERIENCE" TAKE THE INFORMATION AT FACE-VALUE AND MAKE MORE ASSUMPTIONS ABOUT WHAT IS GOING ON INSIDE SOMEONES HEAD.

PSYCHIATRISTS RARELY DISCUSS THIS WITH THE PATIENT BY ASKING QUESTIONS SUCH AS "DID YOU DO THAT DELIBERATELY, AND WHY DID YOU DO IT?" IN ORDER TO CHECK THEIR GUESSES. THERE IS ALSO AN ADDITIONAL COMMUNICATION BARRIER BETWEEN PSYCHIATRIST AND PATIENT WHERE THE PATIENT KNOWS THE PSYCHIATRIST DOES NOT UNDERSTAND THEM AND WILL EFFECTIVELY PUNISH THE PATIENT BY MAKING FURTHER ACCUSATIONS THAT THEY ARE INFERIOR IF THEY ADMIT TO THE PSYCHIATRIST THEIR REAL PROBLEMS.

THE ~~NURSE~~ CARE WORKERS WITHIN A PSYCH-WARD ALSO MAKE SIMILAR ASSUMPTIONS WITHOUT DISCUSSING THEM WITH THE PATIENT AND PASS THIS TO THE PSYCHIATRIST WHO TAKES THEIR CLAIMS AT FACE VALUE WITHOUT QUESTIONING THEM.

WHEN OBTAINING THIS PIECE OF PAPER I ASKED FOR "A FEW PIECES OF PAPER" WHICH THE PERSON REPORTING ON MY BEHAVIOUR INTERPRETED AS ME WANTING A SINGLE PIECE OF PAPER, SOMETHING THAT HAS HAPPENED EVERY TIME I HAVE MADE THAT REQUEST TO MULTIPLE PEOPLE. IF THE PEOPLE REPORTING ON A PATIENTS BEHAVIOUR ARE THAT INCOMPETENT AT UNDERSTANDING THEIR PATIENTS AND THE PSYCHIATRIST IS TRUSTING THEM AND NOT THE PATIENT, HOW CAN THEY POSSIBLY ASSESS SOMEONE IN ORDER TO DETERMINE THEIR NEEDS? HOW CAN YOU POSSIBLY HELP SOMEONE IF YOU MIS-UNDERSTAND THEIR NEEDS?
